MDVM-UNet: Lumbar MRI Segmentation and Lordosis Angle Measurement via a Dual-Driven Mechanism

Authors:	Dongsheng Ji, Yan Zong, Furao Qian, Xiangzeng Chen, Hao Liu, Penghao Chao, Ting Han, Wenhao Fan, Yupu Li
Publication / Venue:	BMC Medical Imaging
Year:	2026
DOI:	10.1186/s12880-026-02418-9
Primary Source URL:	https://link.springer.com/article/10.1186/s12880-026-02418-9
Inventory Category:	Segmentation / localization
Comparability / Priority:	Supporting methodology | Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Segmentation + measurement | Lumbar MRI
Dataset & Cohort:	Private + public lumbar MRI datasets (Sample: None)
Disease / Target:	Vertebral bodies, IVDs, lordosis angle
Model / AI Method:	MDVM-UNet
Evaluation Metrics:	Dice + angle error
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Recent segmentation-plus-quantification system using multiple datasets.

Abstract / Summary

No abstract could be retrieved automatically from open-access indexes. Full text remains behind publisher paywall; please see primary source URL above.
