

Radiologic Criteria for the Diagnosis of Spinal Stenosis: Results of a Delphi Survey

Authors:	Nadja Mamisch, Martin Brumann, Juerg Hodler, Ulrike Held, Florian Brunner, Johann Steurer
Publication / Venue:	Radiology
Year:	2012
DOI:	10.1148/radiol.12111930
Primary Source URL:	https://pubs.rsna.org/doi/abs/10.1148/radiol.12111930
Inventory Category:	Clinical grading / reference standard
Comparability / Priority:	High Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Consensus / Delphi study Lumbar imaging
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Lumbar spinal stenosis
Model / AI Method:	Expert consensus
Evaluation Metrics:	Consensus strength
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Shows that the clinical definition of stenosis itself has historically varied.
