

Semiautomatic Computer-Aided Classification of Degenerative Lumbar Spine Disease in Magnetic Resonance Imaging

Authors:	Silvia Ruiz-España, Estanislao Arana, David Moratal
Publication / Venue:	Computers in Biology and Medicine
Year:	2015
DOI:	10.1016/j.compbimed.2015.04.028
Primary Source URL:	https://doi.org/10.1016/j.compbimed.2015.04.028
Inventory Category:	Early ML / CAD
Comparability / Priority:	High Priority: Critical

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Computer-aided classification Lumbar MRI
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Degenerative lumbar spine disease
Model / AI Method:	Computer-aided classification
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Historical direct predecessor to automated lumbar degeneration grading.

Abstract / Summary

No abstract could be retrieved automatically from open-access indexes. Full text remains behind publisher paywall; please see primary source URL above.
