

Automated Diagnosis of Neural Foraminal Stenosis Using Synchronized Superpixels Representation

Authors:	He
Publication / Venue:	MICCAI
Year:	2016
DOI:	N/A
Primary Source URL:	https://www.jmir.org/2024/1/e54676/
Inventory Category:	Early ML / CAD
Comparability / Priority:	Very High Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Automated diagnosis Lumbar MRI
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Neural foraminal stenosis
Model / AI Method:	Machine learning with synchronized superpixels
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Early automated work on one of the exact RSNA condition families.

Abstract / Summary

No abstract could be retrieved automatically from open-access indexes. Full text remains behind publisher paywall; please see primary source URL above.
