

Consensus Conference on Core Radiological Parameters to Describe Lumbar Stenosis—■An Initiative for Structured Reporting

Authors:	Gustav Andreisek, Richard A. Deyo, Jeffrey G. Jarvik, Francois Porchet, Sebastian F. X. Winklhofer, Johann Steurer
Publication / Venue:	European Radiology
Year:	2014
DOI:	10.1007/s00330-014-3346-z
Primary Source URL:	https://www.jmir.org/2024/1/e54676/
Inventory Category:	Clinical grading / reference standard
Comparability / Priority:	High Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Consensus statement Lumbar MRI
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Lumbar stenosis descriptors
Model / AI Method:	Structured-reporting consensus
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Useful for judging whether an AI output corresponds to clinically meaningful stenosis descriptors.
