

External Validation of the Deep Learning System SpineNet for Grading Radiological Features of Degeneration on MRIs of the Lumbar Spine

Authors:	Alexandra Grob, Markus Loibl, Amir Jamaludin, Sebastian Winklhofer, Jeremy C. T. Fairbank, Tamás Fekete, François Porchet, Anne F. Mannion
Publication / Venue:	European Spine Journal
Year:	2022
DOI:	10.1007/s00586-022-07311-x
Primary Source URL:	https://pubmed.ncbi.nlm.nih.gov/35835892/
Inventory Category:	DL stenosis / multi-pathology
Comparability / Priority:	High Priority: Critical

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	External validation Lumbar MRI
Dataset & Cohort:	None (Sample: 882 MRI scans)
Disease / Target:	Multiple degenerative lumbar features
Model / AI Method:	SpineNet
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Demonstrates domain shift and why an internal test set is not enough evidence of clinical generalizability.
