

LSS-VGG16: Diagnosis of Lumbar Spinal Stenosis with Deep Learning

Authors:	Altun
Publication / Venue:	Clinical Spine Surgery
Year:	2023
DOI:	N/A
Primary Source URL:	https://www.jmir.org/2024/1/e54676/
Inventory Category:	DL stenosis / multi-pathology
Comparability / Priority:	Moderate Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Deep-learning classification Lumbar MRI
Dataset & Cohort:	None (Sample: ~1,030 cases reported in systematic review)
Disease / Target:	Lumbar spinal stenosis
Model / AI Method:	VGG16 and comparator models
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Useful baseline, but its binary task is easier than multilevel three-class RSNA grading.

Abstract / Summary
