

Spine-GAN: Semantic Segmentation of Multiple Spinal Structures

Authors:	Zhongyi Han, Benzhenh Wei, Ashley Mercado, Stephanie Leung, Shuo Li
Publication / Venue:	Medical Image Analysis
Year:	2018
DOI:	10.1016/j.media.2018.08.005
Primary Source URL:	https://www.jmir.org/2024/1/e54676/
Inventory Category:	Segmentation / localization
Comparability / Priority:	Supporting methodology Priority: Critical

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Semantic segmentation Spinal MRI
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Multiple spinal structures
Model / AI Method:	GAN-based semantic segmentation
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Influential multi-structure segmentation approach supporting downstream level-specific grading.

Abstract / Summary
