

Multi-View and Multimodal Radiological Grading Using Spinal MRI

Authors:	Park
Publication / Venue:	Research manuscript
Year:	2025
DOI:	N/A
Primary Source URL:	https://ora.ox.ac.uk/objects/uuid%3A48b4514d-f427-4b32-ba4e-46ca06bd3ffd/files/spk02cd13n
Inventory Category:	RSNA / LumbarDISC
Comparability / Priority:	Direct Priority: Critical

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	RSNA-based multimodal grading Multiple RSNA lumbar MRI views / sequences
Dataset & Cohort:	RSNA 2024 (Sample: nan)
Disease / Target:	Lumbar degenerative grading
Model / AI Method:	Transformer-based multimodal fusion
Evaluation Metrics:	nan
Key Finding / Relevance:	nan
Thesis Context (Ch 2):	Direct same-domain evidence on how to combine MRI views and sequences.

Abstract / Summary
