

Automated Radiological Grading of Spinal MRI

Authors:	Meelis Lootus, Timor Kadir, Andrew Zisserman
Publication / Venue:	Lecture Notes in Computational Vision and Biomechanics
Year:	2015
DOI:	10.1007/978-3-319-14148-0_11
Primary Source URL:	https://www.nature.com/articles/s41467-022-28387-5
Inventory Category:	Early ML / CAD
Comparability / Priority:	High Priority: Important

Study Details & Methodology from Literature Inventory

Study Type / MRI View:	Automated grading Lumbar MRI
Dataset & Cohort:	None (Sample: None)
Disease / Target:	Degenerative lumbar features
Model / AI Method:	Computer vision / ML
Evaluation Metrics:	None
Key Finding / Relevance:	None
Thesis Context (Ch 2):	Important precursor to SpineNet-style radiological grading.

Abstract / Summary

No abstract could be retrieved automatically from open-access indexes. Full text remains behind publisher paywall; please see primary source URL above.
